Asphalt Repairs and Impacts to the Public

Lavon Lake suffered severe damages to asphalt roads and boat ramp parking lots during the floods of FY15 and FY16. We requested and were fortunate to receive special funding for some of the damages and repairs began on March 20, 2017. The East Fork Park RV Loop and both boat ramps are slated for repairs. Due to unforeseen weather and contracting issues, work has been delayed and an extended closure is required. The RV loop is closed through June 28, 2017. We greatly regret that this affects your plans and sincerely apologize for the inconvenience however, the construction activities will prohibit access to the RV sites. We'll keep our website updated as more information becomes available.

Individuals impacted by the closure will be given the opportunity to transfer their reservation to the East Fork Equestrian Loop pending availability or to cancel their reservation with a full refund. Sites at Lavonia and Clearlake Parks may still be reserved.

Roads and boat ramp parking lots will also be repaired at the following locations over the coming months:

- Avalon Park
- Little Ridge Park
- Brockdale Park
- Lakeland Park
- Mallard Park
- Clear Lake Park
- Elm Creek Park

During the construction period, we will close each impacted park/area, but will reopen it as soon as the construction is completed for that section. Again, we apologize for the inconvenience. We'll use our website (http://www.swf-wc.usace.army.mil) to keep everyone informed throughout the construction period, or you can give our office a call at 972-442-3141 between 8:00am – 4:30 pm, Monday through Friday.

Sincerely,

Michael Kinard
Lavon Lake Manager
Trinity Region Project
